ECOLOGICAL RISK ASSESSMENT OF CONTAMINANTS IN SOIL

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer, Berlin | Many industrialized and developing countries are faced with the assessment of potential risks associated with contaminated land. A variety of human activities have left their impacts on soils in the form of elevated and locally high concentrations of potential toxicants. In several cases sources have not yet been stopped and contamination continues. Decisions on the management of contaminated sites and on the regulation of chemicals in the terrestrial environment require information on the extent to which toxicants adversely affect the life support function of soils. Ecological insights into the soil as an ecosystem may support such decisions. This book reviews the latest ecological principles that should be considered in this respect. | Preface. Acknowledgements. Introduction. 1. Ecological approaches in soil ecotoxicology; N.M. van Straalen, H. Løkke. Part One: Extrapolation from experiments. 2. Scientific basis for extrapolating results from soil ecotoxicity tests to field conditions and the use of bioassays; C.A.M. van Gestel. 3. Is it possible to develop microbial test systems to evaluate pollution effects on soil nutrient cycling? J. Dighton. Part Two: Populations in soil. 4. Ecotoxicology, biodiversity and the species concept with special reference to springtails (Insecta: Collembola); S.P. Hopkin. 5. Effects of toxicants on population and community parameters in field conditions, and their potential use in the validation of risk assessment methods; L. Posthuma. Part Three: The soil as an ecosystem. 6. Linking structure and function in marine sedimentary and terrestrial soil ecosystems: implications for extrapolation from the laboratory to the field; T.L. Forbes, L.K. Kure. 7. A food-web approach to assess the effects of disturbance on ecosystem structure, function and stability; J.C. Moore, P.C. de Ruiter. Part Four: The spatial component of soil communities. 8. Scale dependency in the ecological risks posed by pollutants: is there a role for...
