

## Engineering Systems for Safety: Proceedings of the Twenty-Third Safety-Critical Systems Symposium, Bristol, UK, 3rd-5th February 2015

By Mike Parsons (Eds)

Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Engineering Systems for Safety contains papers presented at the twenty-third annual Safety-critical Systems Symposium, held in Bristol, UK, in February 2015. The Symposium is for engineers, managers and academics in the field of system safety, across all industry sectors, so the papers making up this volume offer a wide-ranging coverage of current safety topics, and a blend of academic research and industrial experience. They include both recent developments in the field and discussion of open issues and questions that will shape future progress. The topics covered by the 22 papers in this volume include: risk assessment; safety standards; ethics of safety engineering; tolerability of risk; safety of data-centric systems; safety in the Arctic environment; railway safety; formal methods; assurance cases and safety culture. This book will be of interest to practitioners, managers and academics working in the safety-critical systems and safety-related systems areas.

### Reviews

*This pdf may be worth purchasing. This is for anyone who statte there was not a really worth reading. I found out this pdf from my i and dad encouraged this pdf to understand.*

-- **Mrs. Annamae Raynor**

*If you need to adding benefit, a must buy book. This really is for all who statte that there had not been a well worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Claud Bernhard**
