Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Home Nursing: Modern Scientific Methods for the Care of the Sick Efficiency is the keynote in the work of the world today, and no other profession is more up to date than the profession of nursing, with its efficient modern methods in the care of the sick, and the alleviation of suffering. In this second edition of A Textbook on Home Nursing the author has made every effort to take advantage of the latest knowledge in the science of nursing, without losing sight of the original purpose (as indicated by the title) for which this little book was written. The question of diet, in relation to disease, is an important study, these days; and particular emphasis is laid on the number of calories or heat units required to keep the body in proper condition, so a chapter has been devoted to the special foods that give a right balance in nourishment. A chapter of recipes for invalid cooking will also be found of value when planning the diet list. Outdoor treatment in the cure of...
